EDUCATION

University of New South Wales (UNSW)

Sydney, NSW

Bachelor of Computer Science

Sept 2023 – Sept 2026

- **Scholarship: Beasiswa Indonesia Maju (BIM)** – Indonesian Ministry of Education, full scholarship for undergraduate study at UNSW.

EXPERIENCE

Mathematics Olympiad Tutor (Casual)

July 2025 – Present

Olimpiade Matematika ID

Remote

- Delivering one to one Mathematics Olympiad tutoring in English to junior and senior high school students.
- Discuss competition problem solutions for competitions including SASMO, AMO, and SEAMO by explaining problem-solving strategies.
- Deliver questions and adapt teaching methods based on student questions and feedback to support different learning needs.

PROJECTS

Teaching Sample | *React, TypeScript, Chrome Extension, FastAPI, Supabase, Docker*

June 2026 – August 2026

- Collaborated in a team an AI-assisted teaching platform that transforms selected webpage content into structured lesson materials
- Implemented Chrome extension UI and multi-stage lesson planning workflow using React and TypeScript
- Integrated Chrome extension with REST APIs for text analysis, learning activity, suggestions, lesson creation, and lesson generation
- Implemented OAuth 2.0 Authorization Code Flow with PKCE to authenticate extension users through web dashboard using Supabase

RoamSphere | *JavaScript, Express.js, MongoDB, EJS, Cloudinary, Passport.js*

May 2026 - June 2026

- Extended a full-stack destination discovery platform with user authentication, CRUD listings, reviews, image uploads, interactive maps, and geolocation.
- Implemented search, filtering, sorting, pagination, favorites, and user profiles, expanding the original YelpCamp-inspired project with additional discovery and personalization features.
- Integrated MongoDB/Mongoose, Cloudinary, and MapTiler and implemented server-side validation, basic input sanitization, NoSQL injection protection, and secure session-based authentication.

AirBrB | *React, JavaScript, Material UI*

Nov 2025

- Collaborated in a two-person team to develop a clone Airbnb into page-application using React
- Implemented property listing management, including creating, editing, publishing, and managing accommodation listings.
- Developed component and UI tests covering major user workflows
